

Perfect Blend Organics Liquid 2-0-0

Proprietary Process!

Perfect Blend fertilizers are made using a proprietary process that produces a high-quality nutrition to soil microbes that are responsible for breaking down minerals for plants while helping to maintain a balanced pH in your soil.

APPLICATION DIRECTION:

SHAKE WELL BEFORE USE

Dilute at the rate of one gallon of water per 8 oz. of liquid fertilizer. Fertilizer is activated when mixed with water. Activated fertilizer should be used immediately for maximum response. Left over mix should be used within 72 hours.

Household use: Diluted fertilizer can be applied to potted and indoor plants a regular basis.

Lawn & Garden: Apply diluted fertilizer once a month during growing season.

Trees: Soak bare root trees or transplants with liquids before planting. Generously apply to surface and surround trees on a month basis thereafter.

Agriculture: Consult your licensed agronomist for or apply on the minimum basis of one-gallon fertilizer per 16 gallons of irrigation water. Apply at rate of 50 gallons per acre for commercial applications.
